SUMMARY OF RECOMMENDATIONS

1. That the Director, IRI, devote particular attention to ensuring cooperation between IRI/P and IRI/C with respect to ascertaining and meeting USIA needs for finished intelligence from the IAC agencies.
2. That the function statements in the USIA Organizational Manual be revised at an appropriate time to reflect the actual responsibilities of IRI/C and IRI/H with regard to external research.
3. That an additional position be created in IRI/C to meet the Division's responsibilities regarding external research.
4. That the title of the Requirements Branch be changed to Collection Branch.
5. That the person and slot now assigned to the Liaison Branch to handle State liaison be transferred, together with the function, to the Requirements Branch.
6. That every effort be made to avoid imposing on the Requirements Branch ad-hoc and unrelated "odd jobs".
7. That the Dissemination Branch look to the Division Chief, rather than to the Requirements Branch, for guidance and solution of dissemination problems.
8. That the Division Chief make conscious efforts to utilize his liaison personnel in increasing higher levels of liaison and staff responsibility.
9. That the Dissemination Branch exercise greater selective judgment in eliminating or curtailing the distribution of incoming material of dubious value to USIA and to IRI.
